Professional Summary

Fullstack Developer with 4+ years of experience building scalable web and mobile applications using React Native, Typescript and .Net. Experience in leading engineering teams, designing system architecture and delivering production-ready applications in cloud environments.

Education

University of Malaysia Sarawak

Bachelor of Science in Computer Science

March 2021

Experience

Upstack Studio

Software Developer

March 2025 - Present

Remote

- Developed and maintained fullstack applications using React Native, NextJS and NestJS.
- Designed and integrated backend services with Firebase and Google Cloud.
- Implemented CI/CD pipelines, managed deployments, and conducted code reviews to maintain code quality across projects.

Impact Business Solution

Frontend Developer Team Lead

June 2024 – February 2025

Kuching, Sarawak

- Led a team of 5 developers in frontend architecture and implementation using Svelte and Flutter.
- Designed scalable UI in Figma and established a reusable Design System to standardize development.
- Translated business requirement into technical solutions and managed daily sprint execution.

Impact Business Solution

Software Developer Team Lead

July 2023 – May 2024

Kuching, Sarawak

- Led a team of 11 developers using Scrum, overseeing sprint planning, architecture decisions and delivery.
- Provided technical consultation to clients and stakeholders on system design and implementation strategy.
- Delivered fullstack solutions using Flutter (mobile), Svelte (web), and AdonisJS (API).

Impact Business Solution

Software Developer

April 2022 – June 2023

Kuching, Sarawak

- Developed full stack mobile and web applications using Flutter, Angular and .Net Core.
- Integrated backend services and third-party platforms including Firebase for real time notifications and messaging.

Data Solutions Sarawak

Software Developer

April 2021 – March 2022

Kuching, Sarawak

- Developed internal web applications using .Net and maintained production systems.
- Migrated legacy systems from VB.Net to C#, improving maintainability and long-term scalability.

Technical Skills

Languages: Typescript, Javascript, C#, Dart

Frontend: React, NextJS, Svelte, Flutter, React Native

Backend: NodeJS, NestJS, AdonisJS, .Net Core

Database & Cloud: MSSQL, Firebase, GCP

Tools: Git, CI/CD, Azure DevOps
